[The alternative link will **only work** after you have successfully registered using the first link.]

Deadline for Assignment-07: Dec 21, 2025 2:00 PM

No submission can be considered after the deadline ends.

Important Notes:

Due to the Pre-advising schedule on Saturday and Sunday, there is a change in the lab plan as follows:

- No quiz on Dec 13, 2025 and Dec 14, 2025
- **Quiz-05 Date:** Dec 20, 2025, Dec 21, 2025 (as per your routine)
- **Quiz-05 Syllabus:** Assignment-06 and Assignment-07
 - One quiz covering both topics
 - Take Preparation for both assignment problems and outside assignment problems

Learning Outcome:

After completing this lab assignment, students will be able to use Dijkstra's algorithm to solve and adapt shortest path problems in different situations. They will learn to handle different definitions of path cost and work with extra conditions or constraints, building a stronger understanding of how algorithms can be applied and extended to solve complex problems.
